# GET A LIGHTING DESIGN

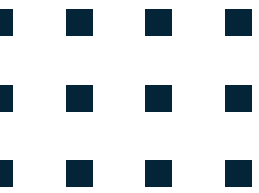

---

Each sport has their own lighting requirements. A lighting design from an experienced designer will help you determine the right light levels for your needs. Sportsbeams provides **free** lighting designs.

Picking the right lights is crucial. The facility will have to live with your choice for years. Select an experienced LED fixture manufacturer, not just a white-labeled fixture that an installer selects for you.

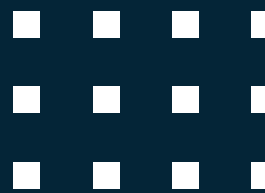

# PICK THE LIGHTS

# FIND AN INSTALLER

Lastly, find a contractor for installation.

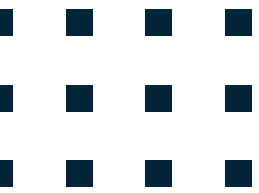

A good electrical contractor should make the installation process as friction-less as possible. If you need help, Sportsbeams can help you find the right one.
